## The Basics of Demand

Using the schedule below, create a demand curve for tacos at a local restaurant. MAKE SURE TO LABEL THE X AND Y AXIS CORRECTLY!

| Price of tacos | Quantity demanded of tacos |
| :--- | :--- |
| $\$ 2.00$ | 75 |
| $\$ 1.75$ | 100 |
| $\$ 1.50$ | 125 |
| $\$ 1.25$ | 150 |
| $\$ 1.00$ | 175 |
| $\$ 0.75$ | 200 |

1. If the price of tacos is $\$ 1.75$, how many will consumers buy?
2. If the price of tacos is $\$ 1.00$, how many will consumers buy?
3. If the quantity of tacos offered for sale is 150 , what is the price per taco?
4. If the quantity of tacos offered for sale is 75 , what is the price per taco? $\qquad$

## The Basics of Demand <br> TEACHER REFERENCE GUIDE

Using the schedule below, create a demand curve for tacos at a local restaurant. MAKE SURE TO LABEL THE X AND Y AXIS CORRECTLY!

| Price of tacos | Quantity demanded of tacos |
| :--- | :--- |
| $\$ 2.00$ | 75 |
| $\$ 1.75$ | 100 |
| $\$ 1.50$ | 125 |
| $\$ 1.25$ | 150 |
| $\$ 1.00$ | 175 |
| $\$ 0.75$ | 200 |

Price

1. If the price of tacos is $\$ 1.75$, how many will consumers buy? 100
2. If the price of tacos is $\$ 1.00$, how many will consumers buy? 175
3. If the quantity of tacos offered for sale is 150 , what is the price per taco? $\$ 1.25$
4. If the quantity of tacos offered for sale is 75 , what is the price per taco? $\$ 2.00$
